## Skibotn trails

Discover and explore Skibotn! Exciting gorges, a powerful waterfall and fantastic views are key attractions on this trip. Here you can reach four trim caches (Hengen, Sledo, Svarteberget and Várdovárri) and a top-trip cache (Ádjit). The tour is a loop along a marked path. The gorge and waterfall at Hengen alone are worth the trip. It's also a unique experience when Olderelva forms a veil of water across the mountain side at Sledo during the flood season. The route to the top of Ádjit traverses terrain. Have a good trip!

**P** At Skibotn sports center by E6 in Skibotn centre.

**i** The trips traverse roads, paths, and terrain.

- Waterfall
- Trim cache
- Viewpoint
- Parking
- Foot bridge (summer)

## Trail description

We recommend parking at Skibotn hall. The trip can be done as a loop. The four trim caches are: Hengen (2,4 km), Sledo (4,2 km) and Svarteberget (2,2 km), Várdovárri (4,7 km). All are blue trails. The top-trip cache is located on Ádjit (8,0 km - black track). The first kilometre follows paved roads no matter which direction you choose. The trip to Svarteberget then follows a service road before it transitions to a path. The walk towards Hengen goes by path. The trip starts with a relatively steep climb, but between Sledo and Vardovárri there is flat terrain. Over the Sledoelva river a hanging bridge is placed every summer.
